

JACOB MUNIKO

Business Studies Educator (CBC) | Full Stack Developer & AI Automation Engineer

Karatina, Nyeri County, Kenya | +254 727 380 378 | jacobmuniko53@gmail.com | github.com/muniko53

PROFESSIONAL SUMMARY

Education major (Business/Commerce General minor) at Karatina University, training to become a Business Studies and Geography teacher under Kenya's CBC framework, with a 12-week teaching practice placement completed. Alongside this, self-taught Full Stack Developer with hands-on experience building and deploying production web applications and AI-powered automation tools proficient in React, Node.js, PostgreSQL, and mobile payment integrations (M-Pesa/Daraja API). Founder of Linklet, a registered campus marketplace platform with 24/7 AI customer support. Passionate about bringing AI fluency into education and using it to solve real business problems across Africa.

EDUCATION

Karatina University | 2023 – 2026 (Expected graduation: October 2026)

Bachelor of Business Management (BBM) Major: Education | Minor: Business/Commerce General

School of Education and Social Sciences, Department of Curriculum Technology and Management

3rd Year, 2nd Semester | Registration No. E100/1799G/23

TEACHING EXPERIENCE

Teaching Practice Geography & Business Studies Teacher | May – August 2026 (12 weeks)

Mathaithi Mixed Day Senior School, Karatina, Nyeri County

- Taught Geography and Business Studies to Grade 10 learners under the CBC Senior School framework
- Designed CBC-aligned exam papers and marking schemes, including a 60-mark two-section format using Kenyan case studies
- Developed lesson plans and interactive teaching materials, including a GIS/Remote Sensing unit and an igneous rocks lesson for assessor observation
- Produced Tables of Item Specification mapped to Bloom's Taxonomy for both subjects
- Co-authored a formal Teaching Practice research report examining access to learning resources, applying frameworks including Bruner and the Heyneman-Loxley Effect

PROJECTS

Linklet Campus Marketplace Platform | www.linklet.co.ke

React.js, Node.js, Express, PostgreSQL, Socket.IO, Tailwind CSS, M-Pesa API

- Built a full-stack marketplace web app where university students buy, sell, and trade items
- Implemented real-time chat between buyers and sellers using Socket.IO
- Integrated M-Pesa mobile payments via the Daraja API for seamless transactions
- Developed user authentication with email verification and Google OAuth
- Built admin dashboard with analytics, user management, and content moderation
- Implemented PWA features with install prompts for mobile users
- Deployed frontend on Vercel and backend on Render, with Supabase for auth and PostgreSQL, and a custom domain via Truehost
- Designed referral reward system with tiered benefits to drive user growth

AI Customer Support Telegram Bot | [GitHub: github.com/muniko53/linklet-telegram-bot](https://github.com/muniko53/linklet-telegram-bot)

Node.js, Telegram Bot API, Groq AI (Llama 3.3 70B), Render

- Developed an AI-powered Telegram chatbot that provides 24/7 automated customer support
- Integrated Groq's LLM API with conversation memory for context-aware responses
- Deployed as a free always-on service on Render with health monitoring
- Designed modular architecture easily customizable for any business by swapping the knowledge base

NSE Market Intelligence Agent

n8n, Yahoo Finance API, Reuters RSS, Claude AI, Zoho SMTP

- Built a fully importable n8n workflow that runs on a weekday cron trigger to track NSE-listed stocks (Safaricom, Equity, KCB)
- Combined live market data with Reuters news feeds and a Claude AI analysis node tuned to Kenyan market context
- Delivered daily analysis briefs automatically via Zoho SMTP email

UniLink Student Gig Platform

React.js, Node.js, PostgreSQL, Daraja API

- Building a platform connecting university students with freelance gig opportunities
- Implementing payment processing with M-Pesa integration for the Kenyan market

TECHNICAL SKILLS

Frontend: React.js, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, REST APIs, Socket.IO, Webhook Integrations

Database: PostgreSQL, SQL, Database Design & Migrations

AI & Automation: Claude AI, Groq API, LLM Integration (Llama 3), n8n Workflows, AI Chatbots, Telegram Bot API

Payments: M-Pesa Integration, Daraja API, Africa's Talking API

DevOps & Tools: Git, GitHub, Docker, Vercel, Render, Supabase, Linux CLI

Other: PWA Development, Real-time Chat Systems, OAuth (Google), Responsive Design, CBC Curriculum Design

ADDITIONAL

Self-Taught Developer: Independently learned full-stack development, API design, and AI integration through building production applications

Career Goal: To teach Business Studies at the secondary/senior school level in Kenya, while continuing to build AI-driven tools for education and business

Languages: English, Swahili

Interests: AI in Education (EdTech), Fintech, Curriculum Design, Open Source
